Case Study

Needs

A New York based financial client needed to upload exchange rates on a daily basis. This was done as a front end on the website when user registers themselves.

There was also a back end where the admin can upload and edit any exchange rates.

Solutions

A basic solution was created on .Net framework solution.

Intelisales used Windows platform to create the solution. Third party SSL and web security was installed configured by Intelisales. VPS Windows Hosting Server was configured and installed by Intelisales.

Please contact Intelisales for more information at info@intelisales.com.
