Case Study

Needs

A Lahore, Pakistan based social business needed a platform for social business match within groups. For example, an elder care is needed to an elderly person. However, the elderly person needed funds to cover the cost of the elder care. A donor (investor) was matched with the need to pay the bills directly to the elder care business.

Solutions

The project required an online portal with up-to-date VPS Windows server with larger RAM and SSD drives, after-sales support, server updates, license updates, SSL updates, Web Security updates, and Email upgrades. The solution was delivered on .Net framework
