## Case Study

### Needs

A Karachi, Pakistan based, client needed a portal to offer skills match services. For example, a business owner or a skilled owner would have their services and skilled advertise on the portal. A customer would purchase their services by matching skills in an online portal.

### Solutions

Intelisales created an online portal with business skills matching services. The framework used was .Net framework. A dedicated Windows server was hosted. SSL and Web Security was installed and configured. Several of the emails were hosted by the third party email provider. The data was being saved within Pakistan due to government rules and regulations.
